2.3 Application Schedule (It may be changed according to the situations)

2-4 Application Acceptance and Booth Adjustment

After receipt of the application, Organizers will notify the applicant in writing as the official acknowledgement by the end of January 2020. However, there might be cases that Organizers coordinate the number of the booths requested or cannot accommodate the application taking previous exhibit records of applicants into account when total demand exceeds the exhibition floor capacity or reviews of the application reveal irregularities. In these cases, Organizers will notify such applicants in writing by the end of January, 2020. In this regard, Organizers or the cooperating organizations shall not be liable for any damage caused by rejection of the application or reducing the number of booths.

2-5 Payment Terms

Organizers will send the applicant the first invoice for the half amount of the total booth rental fees as subscription money, together with the official acknowledgement by the end of January, 2020, which the applicant shall remit to the specified bank account by the due date stated on the invoice. Then, Organizers will send the applicant the second invoice for the balance of the total booth rental fees by the end of April, 2020, which the applicant shall remit to the specified bank account by the due date stated on the invoice. (Bank handling charges are the liability of the applicant.) In case the applicant is a member of cooperating organizations, the organization may handle billing and collection of the fees on behalf of Organizers.

2-6 Cancellation or Modification of Application

Organizers will not accept cancellation or modification of the application after it is approved, except for the case in which Organizers exceptionally approve them after receipt of written requests from the applicant. In case of cancellation, Organizers, or the cooperating organizations will not refund the paid-up amount to the applicant, regardless of the reasons for it.

2-7 Exhibition Space Allocation

Organizers will decide on the allocation of the exhibition space (please refer to Article 3 of "The Provision of Exhibition Agreement," page 11) and will notify the applicant of the space allocation, with the second invoice. The applicant has no right to oppose or demand changes with respect to the allocated exhibition space. Also, the applicant is not allowed to conduct such actions on part or all of the allocated exhibition space as selling/buying, collateralizing, transferring or lending to any third party, except for co-exhibitors and represented companies. (Please refer to 2-2-(2) for "co-exhibitors and represented companies".)

The exhibition agreement shall take effect from the date when Organizers confirm the full payment of the booth rental fees by the applicant. After the effective date, the applicant will have the right as an exhibitor to use the allocated exhibition space. If the payment is not made by the specified due date, the agreement shall not take effect, and therefore the applicant will not have the right to use the exhibition space. In this case, Organizers, or the cooperating organizations will not refund the paid-up amount to the applicant, regardless of the reasons for it.

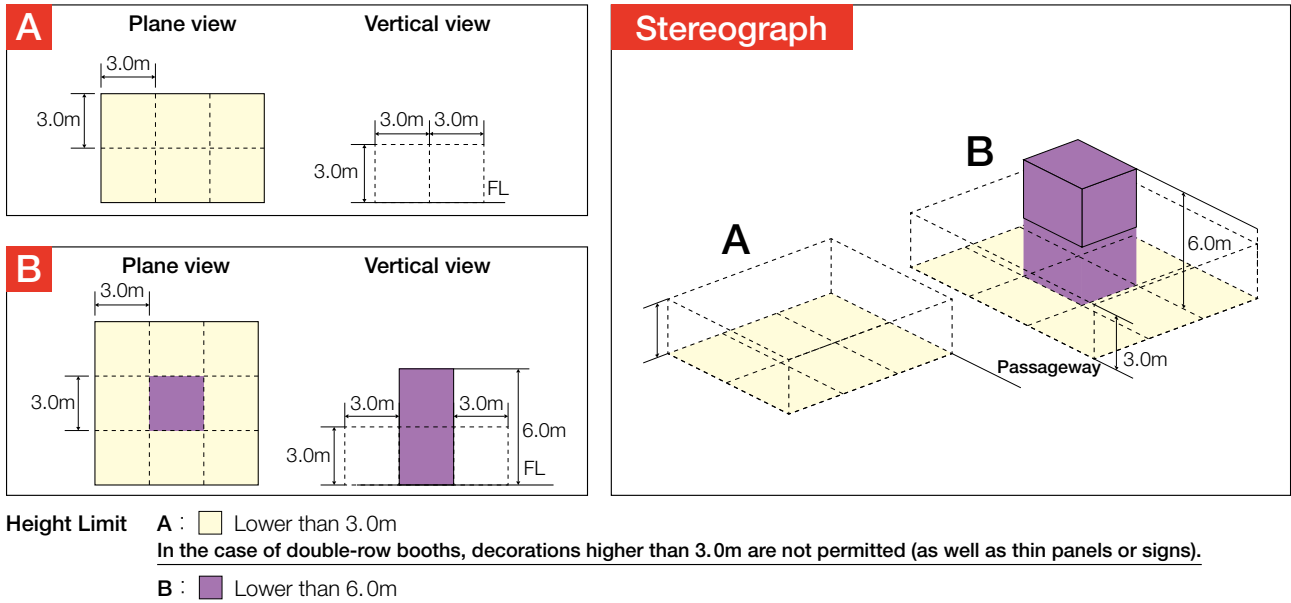

2-9 Cancellation or Modification of Exhibition Agreement

Organizers will not accept cancellation or modification of the exhibition agreement after it is concluded, except for the case in which Organizers exceptionally approve them after receipt of written requests from the exhibitor. Organizers will not refund the paid-up amount to the exhibitor because of the cancellation or the reduced amount because of the modification, regardless of the reasons for them. If the exhibitor loses the qualification of the member of cooperating organizations or overseas associations, the agreement shall be automatically changed, and the status of the exhibitor shall be changed to the "Non-member". In this case, Organizers will additionally charge the exhibitor with the difference of the booth rental fees. If the exhibitor does not start using the allocated exhibition space by 13:00 on December 6, 2020, Organizers will take it as the cancellation of the agreement, and the exhibitor will lose the right to use the space. In this case, Organizers will not refund the paid-up amount to the exhibitor. Furthermore, Organizers or the cooperating organizations shall not be liable for any damage caused by such actions.

3. Display and Decoration

3-1 Decoration Height Requirements

All decorations including lighting must be confined to a maximum height of 3.0m (refere to the picture A below). However, the height limit for decorations rises up to 6.0m in the area which is 3.0m away from passage-ways, adjacent booths and walls (refer to the picture B below. Banners are the exceptions. Please see "3-4 Banners in Booths"). For reasons of fire safety, the construction of roofed or covered booths and decorations over 3.0m high are limited to the approval of Organizers. Exhibitors wishing to include any of these contradictions must apply and submit blueprints to Organizers to obtain permission. After consulting with the Fire Department, Organizers will study the drawings and advise the Exhibitor as to the location of smoke detectors and the necessity to install package-type fire extinguishing equipment or fire extinguishers (the cost of installation will be the responsibility of the exhibitor). There is no height limit for the exhibits, however, please check with the application form and notify Organizers when the exhibit is over 3.0m.

3-2 Eased restrictions on the height for installation of lighting equipment

- Only when exhibitors, which occupy 15 or more exhibition stand units, meet the following requirements, they shall be able to install lighting equipment measuring up to 6.0m in height, with no setback away from passage-ways and a 1.0m setback from the adjacent booths.
- (1) If lighting equipment measuring up to 3.0m in height cannot apply enough light in showing exhibits to visitors due to the characteristics of these exhibits (for example, when a large machine is displayed at the edge of a passage).
 - (2) If it is considered that the lighting equipment measuring more than 3.0m, which should be placed in an exhibition stand set adjacent to a wall of the venue, does not affect the view of other companies' exhibition stands.
 - (3) The exhibitor has submitted an installment plan document to the organizer in advance and has obtained permission.
 - (4) The lighting equipment should meet the following requirements:
 - ① The lighting equipment should consist of lighting that applies light to exhibits and the support structure and should not have a decorative factor.
 - ② Their shapes should enable the lighting to be installed on the top of the support structure.
 - ③ The support structure must be necessary for the installation of the lighting.
 - ④ The lighting and its support structure should not have any factors suggestive of certain companies such as the name of exhibitors and logos.
 - ⑤ The color of appearance should be a simple color such as white, black, or silver, and should not extremely stand out.

3-3 2-Story Booth (Three or more stories are not permitted.)

At JIMTOF 2020 there will be no fees levied on 2nd floor space; however, a 2-story structure may only be erected by exhibitors who have contracted for 15 booths or more at that location. Also, 2nd floor space may only be used for business meetings. Full details of conditions applying to such structures will be made available in the "Exhibitors Manual."

3-4 Banners in Booths

More than 21 booths of exhibit at one location may apply for banner. For security reasons, Organizers will make and put up all banners for the Exhibitors at the Exhibitors' expense.

3-5 Decoration Materials

All materials used for decorations must be approved as fire proofed by the Japanese Fire Defense Law. Exhibitors wishing to use materials approved by overseas laws are required to submit a written notice as required along with a product sample to Japan Fire Retardant Association for quality assurance certification in order to prove that the materials meets the applicable standards.

*For more details about displays and decorations, including regulations above, please refer to "Exhibitors Manual".

4. Handling of Fire and Hazardous Materials

The exhibitor is not permitted to use open flame or to bring hazardous materials in the exhibition area by The Fire Prevention Ordinance in Tokyo, except for the case in which they obtain the written permission in advance from the local fire station under jurisdiction. Even in the case of the permission from the fire authorities, there might be a limit to the amount of hazardous materials that can be brought in, which is determined by the layout of the hazardous materials in the booths, and the surrounding conditions. Also, the exhibitor is not permitted to operate machines containing oil in excess of specified volume. If the exhibitor apply an amount of huzardous materials that exceeds the specified volume, organizers will adjust the number.

The "open flame" means a device or an object that generates a flame or spark, or a device the heating unit of which is exposed to the outside. The "hazardous materials" indicates gunpowder, combustible gas, and other materials listed on the annexed table of the Fire Service Law, 4th group. (See the annexed table.) The exhibitor who wants to use these hazardous materials in the trade fair is requested to notify the effect in the application form. Also, the exhibitor can contact Organizers for the reference materials or more detailed information.
